

8' HEIGHT AVAILABILITY FOR STEEL-EDGE DOOR STYLES

visit taylordoor.com to view our complete offering

Our Steel-Edge Door Collections are designed for strength, security, and durability. These doors are fully constructed out of hot-dipped galvanized steel that resists warping, rotting, cracking, and corrosion. The full steel-edge perimeter grants an industry-leading Grade 40 Security Rating and ensures that these 8' door styles will stand straight and true for years to come.

8' HEIGHT AVAILABILITY FOR FIBERGLASS DOOR STYLES

Our Fiberglass Entrance Door Collections add depth and dimension, while also being low maintenance and energy-efficient. They are engineered for durability and longevity and are available in a variety of textures. They are made from high-impact, compression molded skins that are designed not to crack, splinter, warp, rot, or delaminate and feature composite top and bottom rails that protect against water infiltration.
